European Network Nursing Academies - ENNA

History and activities
ENNA was founded in 2007 through a bilateral exchange between two Swedish Academies and one German, namely:
- the University of Borås
- the University of Gothenburg
- the University of Witten/Herdecke.

The topic patient safety and nursing was chosen as a first field of exploration. This is a hot item internationally and offers a variety of subtopics. In nursing science, patient safety is only scarcely found and needs more attention.

The first conference on Patient Safety and Nursing was organized in 2009 in Witten/Herdecke, Germany. A second conference on the same topic was organized in 2011 in Zurich, Switzerland. The next conference will be held in Utrecht, Netherlands in 2015.

The official founding of the society was in 2012, the residence is Düsseldorf, Germany.
